REPORT OF THE UNIVERSITY LIBRARIAN

1962 - 1963

LIBRARY
Calgary campus

The central section of both libraries will open in September; the wings that are shown in the illustration will be added at intervals of several years.

The University of Alberta

REPORT OF THE UNIVERSITY LIBRARIAN
TO THE PRESIDENT

For the Period
April 1, 1962 to March 31, 1963

In the year just ended the book collections of academic libraries across Canada have been subject to survey and comment. Humanities and social sciences collections in the 14 major English-speaking universities were surveyed by Edwin E. Williams under the auspices of the National Council of Canadian Universities and Colleges, and generally found wanting. Later a report on research in these two broad fields of knowledge was prepared by Bernard Ostry for the Humanities Research and Social Sciences Research Councils of Canada; it suggested that the Dominion government provide \$50,000,000 exclusively to improve Canadian university libraries by the purchase of books. More recently the council of presidents of the universities of Ontario issued a report "*Post Secondary Education in Ontario, 1962 - 1970*" in which they state, speaking of colleges, that "*One of the most important problems in the development of adequate facilities is the provision of libraries.*" This concern about the adequacies of book collections extended to medical libraries for in mid-summer a survey of the libraries in Canadian medical schools was made by Miss Beatrice Simon at the request of the deans of medicine of Canadian medical schools and the Canadian Library Association's Committee on Medical Sciences Libraries.

Since the Williams report on our Edmonton collections in the humanities and social sciences commented on each subject collection separately, it is difficult to summarize his findings: I believe the essence of his report to have been that while our collections were usually wanting in terms of graduate research needs, in recent years our library has been in the vanguard in its rate of collection building. The Simon report on medical libraries has not yet appeared.

In November the University of Toronto Library - with the largest research collection in Canada - added the millionth volume to its central collection, an occasion for festivities and felicitations. Lest any should think that a certain number of volumes spells adequacy in a university library, one should perhaps quote a sentence from Williams' keynote speech in which he said that he would "*look with great suspicion on any university that was not discontented with its library.*"

Here on the Edmonton campus, our library passed a more modest landmark when it added the 300,000th accessioned volume, nearly triple the volumes in the library system when the Rutherford Library was opened in 1951. In addition to this our library has a collection of an estimated 97,000 government documents and a substantial library in microform. On the Calgary campus the library collection reached the 60,000 volume mark; this library also has a documents collection of several thousand volumes and the beginning of a micromaterials collection.

Funds available for the purchase of library materials were up substantially over the previous year. In 1962-63 the University Board of Governors made available for book purchases, in addition to the sum originally provided in the Estimates, a grant to offset the loss of purchasing power when the Canadian dollar was devaluated, and in December a special supplementary grant; on the Edmonton campus the book fund totalled approximately \$280,000. On the Calgary campus, funds were provided similarly to make the total book fund approximately \$136,000.

The growth of the Edmonton collection by type of material and number was as follows: 39,593 accessioned volumes; 18,332 government documents; 344 pamphlets; 155 Alberta theses; 859 maps; 1,580 reels of microfilm; 7,263 microcards; 259 microprint sheets; and 335 microfiche. But the value of our acquisitions cannot be judged by numbers alone, but by notable additions as well.

A mere sampling of our outstanding acquisitions include the magnificent gift of the Portuguese government *Portugaliae Monumenta Cartographica*, and also Netherlands *Commissie voor's Rijks Geschiedkundigen Publicatien* (105 vols.), Martens' *Recueil des principaux traites* (126 vols.), and collections of books by and about G. K. Chesterton and first editions of Sir Walter Scott. Increasingly, individual specialists among the academic staff are expressing pleasure at finding in our collection some documentary or specialized work invaluable to their research. At year's end we have successfully negotiated the purchase of a highly specialized private library of several thousand volumes which when obtained may probably be the best in its field on this continent.

Since a library prides itself on its manuscript holdings, or holdings which are rare or unique, mention must be made of Dr. E. Reinhold's success in obtaining for the library photostats of a rich collection in private hands of personal papers of the German playwright, Georg Kaiser, and of receipt from the Trustees of Dove Cottage of more photostats of original materials relating to the poet Wordsworth. In order to encourage the collection of manuscript materials for the library a university archives committee was organized under the chairmanship of Dr. L. Thomas.

On the Calgary campus at year's end the library area was bursting at the seams with the addition of 17,819 accessioned volumes, 213 reels of microfilm, 3,212 microcards, 43 phono-records, and several thousand government documents. The book collection increased by 42%. Notable acquisitions were the purchase of the political economy library of the late Professor —. E. Britnell of the University of Saskatchewan, and the gift from the Junior League of Calgary of the Human Relations Area Files in microtext.

Staff

The following professional librarians joined the Edmonton staff during the year: Mrs. Hanka Bednarski, Dr. Leila Howell, Mr. William Hyrak, and Mrs. Diana Taschuk. On the Calgary campus Miss Helen Smith joined the staff, and Miss Lois Carrier took over as head of the Circulation-Reference Department.

Resignations from the professional staff were as follows: Miss Phyllis Morgan, Miss Patricia McNeill, and Mrs. Mary Ann King from Edmonton, and Miss Flora Macleod from Calgary.

In May several members of the professional staff attended the Alberta Library Association Conference in Banff and the Canadian Library Association Conference in Ottawa.

Members of the staff of University of Alberta libraries have been working on a Canadian Library Association committee to draft standards for Canadian university libraries. The work of the committee is reviewed by a group of consultants who are prominent university librarians across Canada. Finally the report on standards will be submitted for the approval of the Canadian Library Association.

Library Committee and Sub-Committee

The Library Sub-Committee, which has a membership of seven, held twelve meetings during the year to advise the Librarian. The most important and

most frequent topics of discussion were the allocation of money to teaching departments and the approving of expensive special purchases. The Library Committee held one meeting.

Library Administration

In Library Administration the planning of the new library buildings took precedence over all other administrative matters. The Chief Librarian was ably supported by the Assistant Librarians in the innumerable details and endless checking which are involved in the planning and furnishing of new buildings. At the time of writing the exterior of the Education Library wing is completed, while this part of construction of the main library buildings on the Calgary and Edmonton campuses is also moving along rapidly.

Planning the new pattern of service which will go into effect with the completion of the buildings in August, 1963, also formed an important part of the work of the Librarian's Office.

Order Department

Miss Lilian Leversedge, Order Librarian, in her report remarks that outgoing book orders in the month of March were equal to the department's annual operation ten years ago. Altogether during 1962-63 the department ordered 24,123 titles in 34,611 volumes. At the year's end approximately 10% of orders had not been received because ordering continued until the end of the fiscal year. An interesting trend in our acquisitions is that standing orders for sets, continuations, and annuals now total 1400 titles, representing a continuing commitment of approximately \$21,000, a tenth of the original budgeted book fund. The trend continues toward expending a greater percentage of our book fund on out-of-print materials, and as some of this will probably never come on the market the Library must give thought to purchasing xerox or duopage reproductions.

Miss Leversedge was on leave-on-assignment from October to January during which she took some classes in bibliographical and procedural techniques as it applies to book acquisition work, visited acquisitions departments in some major American university libraries, and made valuable contacts for our library in the book trade. On her return Miss Leversedge recommended the drafting of a formal acquisitions policy and more participation by library staff in book selection. During Miss Leversedge's absence the department was ably administered by Mr. Kantautas.

Our library has always felt at a disadvantage in collecting because of our distance from centers of the book trade. This past year several book and periodical dealers from Europe and eastern United States have visited us, and indeed one flew from New York specially to visit our library; these visits indicate that our library is now recognized as being in the major league.

Cataloguing Department

Mr. Daniel Reicher, Chief Cataloguer, reports no major changes in the smooth working of this department, other than the use of photographic equipment to photograph entries from the Library of Congress printed catalogue. This procedure has replaced the ordering of printed cards from Washington and has greatly speeded the processing of books. During the year the department completed the catalogue for the Physical Sciences Reading Room.

The department catalogued 17,950 monographic titles in 29,101 volumes, 701 serial titles in 11,211 volumes, and 521 micromaterials titles. The number of volumes added was approximately 5000 more than last year. The typing staff prepared 163,320 cards for the catalogues in the library system. Every workday 500 to 600 cards are added to the Union Catalogue.

Periodicals Section

In reporting on the first full year of the operation of this section, Mrs. June Thomson noted completion of the revision of the Check-In Record of periodicals issues received and substantial progress in revision of the Periodicals Holdings Record which lists all issues and volumes of periodicals in the library system. It was this need for greater bibliographic control over our periodicals records which led to the organization of the Periodicals Section in 1961.

The survey of Mr. Edwin E. Williams confirmed all of us in our belief that our library ranked high among Canadian university libraries in the number of current subscriptions, but much lower in a comparison of holdings. Subscriptions were placed for 490 additional journals to bring our subscriptions to 3,391 titles, but in addition the library received 860 titles gratis, so that the total number of titles being received currently is 4,251. The increase is 19.6%. The periodicals received by library areas are as follows: - Applied Science, 591; Education, 218; Law, 110; Periodical Reading Room, 1,362; Physical Sciences, 281; Medical, 935.

In many disciplines the lack of back files of important journals has been a serious handicap in research. A substantial beginning in filling this lacuna was made by an expenditure of \$52,000. This amount purchased 1,169 bound volumes, 1,667 unbound volumes, 340 volumes on microfilm and 1,788 single issues. In addition, through exchange the library obtained 86 volumes and 353 separate issues of periodicals.

In the Periodical Reading Room, housing the humanities and social sciences periodicals, attendance was 15,207 and circulation 35,241.

Bindery Preparation Unit

Mr. Alan Rankin, binding supervisor, sent out 6,732 volumes for binding as compared with 6,462 in the previous year. In addition, 292 pam-binds were put in, and 161 books repaired in the unit. The expenditure on binding at \$33,218 approximated the expenditure of the previous year. Local binderies continue to give the Library excellent service, but their prices remain high.

Reference Department

Miss Dorothy Hamilton, Reference Librarian, noting that in the autumn the service will have been moved to the new library, opens her report with an historical survey of the changing pattern of responsibility and service of her department in its twelve years in the Rutherford Library. In 1951 the Library had almost no documents, maps, and micromaterials; now our collections in these forms are quite extensive.

In the year under review the Library added 18,332 documents from issuing bodies as follows: 7,403 Dominion Government; 1,839 Provincial Governments; 2,995 United Nations; 3,478 United States; 1,254 foreign; 830 United Kingdom; 533 international organizations. As stated elsewhere the Library now has a collection of approximately 97,000 documents. Accessibility of more commonly used documents within the reading room resulted in more being consulted than formerly; 3,454 were borrowed, double the number of the previous year.

The Library's growing collection of micromaterials was used by 576 persons during the year. Toward the end of the year the Library purchased five more years of the program to microfilm all English books published before 1700, that is, those books listed in the Short-Title Catalogue. The Library added to its equipment for reading and printing micromaterials.

The map collection, less accessible this year because of its location on the top floor, was less used than formerly. During the year 899 maps were added. In 1951 the Library had about 50 maps; now it has 18,000 maps, most of them sheet maps. As official repository for graduate theses written here, the Library received at spring and fall convocation 155 and 130 theses respectively. The Reference Department added 344 booklets to its pamphlet collection, 307 volumes to its Rare Book collection, and 48 volumes to the Rutherford Canadiana collection. The Library is adding more and more scarce and rare volumes, not all of which get into the Rare Book collection; next year the library's stack collection will be surveyed to locate these volumes so that they can be transferred to the Rare Book Room where they can be given proper care and supervision.

Inter-library loans requested by faculty and graduate students numbered 1,984; campus borrowers were 256 faculty and 135 graduate students. Of the material obtained from other institutions, 1,184 were books or periodical volumes, 800 in photostats or microfilm. Our library sent 331 volumes and 104 photocopies to other libraries. The requests from other libraries included requests to borrow 55 Alberta theses.

The number of reference questions asked was 6,609. The circulation of non-reference books was 12,776, and attendance in the reading room was 209,700.

Circulation Department (including Reserve Reading Room)

In this department the annual statistics in recent years have reflected the larger student enrolments. Borrowing from the main stacks was up by 10%, from the Reserve Reading Room by 15%. The figures of volumes circulated were 113,378 and 52,428 respectively. At the main circulation desk books were daily

being borrowed in such numbers and returned in such quantities that it was only with difficulty that staff kept control of the records and the re-shelving of books. The situation was aggravated in the early part of the winter session by an unusual number of staff changes and the need to train the new staff before they could effectively cope with library procedures and records.

Miss Norma Freifield, Circulation Librarian, gave a series of ten lectures to students enrolled in the Evening Credit Program. In August this department again set up a collection of books for the use of students in the UNESCO Seminar. During the summer some 15,000 volumes were moved from the main stacks to the former Smoking Room in the basement, and much of the stack collection shifted to make the best use of shelving gained. A total of 18,751 recall notices were sent out, just double that of the previous year. The increasing number of student borrowers who are ignoring recall notices until reported to the Chief Librarian and the Provost for action, will necessitate the institution of a system of fines.

In the Reserve Book Room the number of books which professors requested housed there increased to 6,213, nearly 50% above the number previously in the room.

Law Reading Room

Attendance in the Law Reading Room was down over the previous year, but the circulation of volumes outside the reading room was up somewhat over 1961-62. The figures were 37,042 and 12,945 respectively.

The Law Librarian, Mr. Denys Noden, in his report notes that the year under review is the third in which special funds were made available by the Board of Governors to develop the law collection. A major portion of these funds was devoted to adding to the National Reporter System of which the library now has nine of the thirteen series. Other outstanding acquisitions included the Irish Reports and the Reports of the United States Board of Tax Appeals and the Tax Court, as well as several sets of periodicals. In all, 3,682 volumes were added as compared to 2,844 the previous year. In Canadian material some gaps remain, mostly early statutes of the eastern provinces, but these are being acquired as they come on the market.

Medical Sciences Reading Room

Significant developments mentioned in the report of the medical librarian, Miss Phyllis Russell, were the Simon survey of university medical libraries, curtailment of the circulation of medical periodicals and the introduction of xeroxing as substitute, and an increase in financial support from the College of Physicians and Surgeons of Alberta. The decision to retain journals in the library (except over week-ends) was reached after a questionnaire indicated that five-sixths of those surveyed wanted journals in the library available for consultation at all times. In January the Library experimented with free xerox copies to persons wanting material out of medical periodicals, but this was a utopian venture; now free xeroxing is limited to members of the College of Physicians and Surgeons.

Attendance in the Medical Reading Room was 75,539, while circulation was 40,361 volumes. These figures represent increases of 16% and 7% respectively. Edmonton doctors were given 251 hours of reference service, rural doctors 42 hours of service. During the year 1,102 books and 516 bound volumes of periodicals were added to the collection.

Applied Sciences Reading Room

The Applied Science Librarian, Mrs. Emma MacDonald, reports that attendance was 125,301 and circulation was 23,176 during 1962-63. The department answered 2,458 reference questions. The library staff spent 38 hours giving engineering students lectures on the use of library materials, and distributed to these students 273 bibliographies. As this is the last year this subject library will operate in its present quarters, the Librarian appended a statistical summary of the development in service since 1951-52. An important trend has been the great increase in the use of abstracts, indexes, and periodical references as graduate studies has developed.

During the year the reading room added to its collection 1,288 new books, 1,931 documents, 3,340 standards, 40 chemical and petroleum summer reports, and 7,180 loose-leaf reference sheets for interfiling in loose-leaf services.

Physical Sciences Reading Room

In the second year of its existence this reading room seems to have been discovered by science students, so much so that some faculty members complained of too many undergraduates occupying study space in a library intended primarily for graduates. Attendance was 53,850 representing an increase of 85%. Circulation was 8,263, or an increase of 89%. Mrs. Marjorie Corah, the supervisor, reports that the catalogue was completed during the year, and that the mathematical section of the collection was moved up to the stack mezzanine to provide more room for the expansion of the chemistry and physics section.

Education Library

Miss Moira English, Education Librarian, in her report records a circulation of 101,585 volumes and an attendance of 116,285. These figures suggest a levelling off in library use with an increase of only 4% in circulation but of 15% in attendance. The same levelling trend is apparent in Summer Session attendance which over the last four years had varied little.

During the winter session the reserve reading room was kept open the same hours as the main reading room. Shelving the journals in the reserve area alleviated the congestion in the main reading area. Shortage of space made it necessary to put older material into storage.

A collection of books was sent to service an educational administration course held at Banff in May, and another collection to service a leadership course for principals at Concordia College in July. In addition, the library sent books to four out-of-town centres where education courses were offered under the Evening Credit Program.

Among important acquisitions was the purchase on microfilm of 130 theses written for education colleges.

CALGARY LIBRARY

Miss Dorothy Ryder, Librarian, in her annual report recorded a remarkable expansion of the collection, particularly in the acquisition of government documents and files of periodicals. The book stock, with the addition of 17,819 volumes, was increased by 42%. The number of accessioned volumes in the Library on April 1st was 60,039. As mentioned earlier, the two most important acquisitions were Dr. G. E. Britnell's collection in political economy, and the Human Relations Area Files.

The Library utilized every available inch of space within the present quarters for book storage and to provide more tables and chairs for study purposes.

The Library Committee's composition was changed somewhat by increasing Arts and Science representatives to three, and with the appointment of a student representative. Eleven meetings were held during the year. The most important work of the Committee was advising the Librarian on the allocation of the book fund, and considering requests for special purchases.

Throughout the year Miss Ryder was heavily involved in the problems connected with the planning and furnishing of the new library building. In addition to administrative responsibilities, the Librarian carried on many of the duties of a serials librarian in the absence of one of the staff.

The Library received as gifts from interested friends 1,546 volumes of books and journals, the Human Relations Area Files worth \$3,500, and \$730 from four donors.

Processing Department

Miss Elizabeth Skeith, head of the Processing Department, reports that 11,950 titles were ordered and 15,088 volumes received. With periodical volumes bound and added to the collection, the total volumes catalogued was 17,919, an increase of 29% over the previous year. In addition, the department catalogued 213 microfilms, 3,212 microcards, and 46 phono-records. The department filed 72,525 cards as compared with 46,850 the previous year.

Serials Department

The number of periodicals titles currently received is 1,220. Of these, 219 are new subscriptions placed during the year. The expenditure on back files was double that of the previous year. The number of volumes added in 1962-63 was 2,285 as compared with 977 the previous year. A total of 2,084 volumes were sent to the bindery as compared with 1,237 the year before.

Reference-Circulation Department

In September Miss Lois Carrier took charge of this combined department. The statistics of library use are an indication of the rapid growth of the student body on the Calgary campus. The circulation of books was 104,539, a percentage increase of 46% over 1961-62. The recorded attendance was 455,600, representing an increase of 59%.

The increase in the number of inter-library loans is perhaps indicative of the growth of research on the Calgary campus and the need for a larger library collection. The number of loans requested was 840 (excluding loans made from the Rutherford Library) as compared with 93 two years earlier.

As indicated earlier, the government documents section of the Library was greatly expanded. The collection now numbers 1,146 documents.

Gifts Received by the Library (Edmonton)

- From the College of Physicians and Surgeons \$5,000.00
- From the Edmonton Academy of Medicine \$150.00
- From the Committee to Commemorate the 5th Centenary of the Death of Prince Henry the Navigator. Portugaliae Monumenta Cartographica
- From Mr. Metrofan Kosenko, art books
- From Dr. F.G. Winspear, Memoirs of George Dewes
- From Mr. M. R. Rutherford, U.S. Consul, books relating to Russia
- and numerous others.

Gifts Received by the Library (Calgary)

- From the California Standard Co. \$500.00
- From the Institute of Chartered Accountants of Alberta \$100.00
- From the University of Alberta Medical Alumni, Calgary \$100.00
- From Mr. N. S. Trough \$30.00
- From the Junior League of Calgary – Human Relations Area Files (\$3,500.00)
- From the Austrian Consulate, Ottawa – 61 vols. Austrian history and literature
- From the German Consulate, Edmonton – 18 vols. German history and sub. to Die Welt
- From the United States Consulate, Calgary – Mr. E. Madill – 96 vols. –
Foreign relations of the United States. 15 vols. – miscellaneous and sub. to
State Department Bulletin
- From the Dominion Bureau of Statistics, Edmonton – 67 vols. Canadian census
- From Dr. and Mrs. G. W. Crickmay – 56 books and miscellaneous pamphlets, numerous
spears and artifacts – Indians of South America
- From the Calgary Public Library – 225 vols. – general
- From Mr. James R. Hamilton – 106 geology, botany and zoology and runs of
geology journals
- From George Ray Johnson Memorial Collection – presented by Mrs. G. R. Johnson
150 vols. – general
- From the Dr. W. C. McCalla Memorial Collection – presented by his family – 52 vols.
botany

From Mr. W. C. McCalla – 54 vols. – general

From the Medicine Hat Public Library – 33 vols. – Debates of the House of Commons

From the Dr. Geneva Misener Estate – 56 vols. – classics

From Mr. and Mrs. Miles Patterson – 70 vols. – general

From Prof. A. R. Prince – 38 vols. – American journal of botany, and 75 vols. of journals mainly botany

From the Rutherford Library, Edmonton – 87 vols. – general

From Mrs. T. M. Schulte – 51 vols. – Harvard Classics

From Mrs. W. E. Robinson – 31 vols. – engineering and runs of journals

From Dr. G. W. Crickmay – 27 vols. – geology

From the Soviet Consulate, Ottawa – 21 vols. – Russian history and literature

SELECTED LIST OF NOTABLE ACQUISITIONS

EDMONTON CAMPUS

1962-63

Monographs

- Allestree, R. The works of the learned and pious author of the whole duty of man. 1695.
